“Mickey mouse” profile with TEE-slots cylinders to ISO 15552 standard Ø 32 ÷ 100

series XT

DESCRIPTION

Cylinders series “XT”, and their fixing accessories comply with ISO 15552 standard, being in this way completely interchangeable with the former cylinders to ISO 6431/VDMA 24562 standard. They are available in the bores from Ø 32 to Ø 100 with techno-polymer piston as standard and the barrel, a profile in extruded aluminium alloy “mickey mouse” style, has two TEE-slots on one side where it’s possible to mount directly the magnetic sensors series “FM100”. Upon request, cylinders series “XT” comply with ATEX directive, 2GD category.

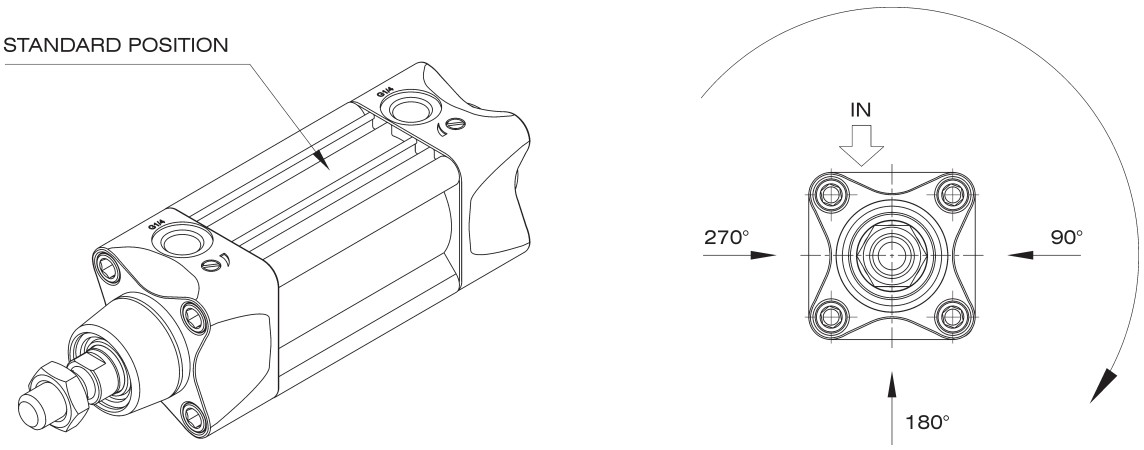
POSITION OF SENSOR SLOTS



Note: In XT series cylinders, the sensor slots can be positioned on any of the four sides. By default, they are supplied with the slots on the same side as the air inlets. To change the side, specify the angle at the end of the order key, using the air inlets as a reference.

EXAMPLE ORDER:
50mm diameter cylinder, double acting, 100 mm stroke, non-magnetic piston type, with sensor slots on the right relative to the air inlets, 50/100 XT/N 90°
